Delivering Confidence

Dust, pollution and now COVID complications have resulted in an increase in hair problems. Similarly, due to multiple causes, issues related to skin are also on a rise that leads to low self esteem and inferiority complex. The desire to have a flawless skin and healthy hair remains on the priority list of the modern age people. To cater to this need of the population in Nagpur, 'Pearl Skin & Laser Clinic' seems the perfect place. Owned by Dr. Anshul Jain who is a Skin Specialist and Cosmetologist with an experience of around a decade and a half, the Pearl Hospital offers all kinds of hair, skin and laser treatment. This young doctor has brought about a massive change in people's life with having 1000+ vitilligo surgeries in her name. She has presented her clinical and research papers at National Level and has been awarded for the same. Pearl Skin & Laser Clinic has

been her dream project which is now converting people's dreams into confidence with the most advanced and complex cosmetic procedures like 3D Cog and Derma Fillers which were earlier available only in big cities like Delhi and Mumbai. The other major procedures and treatment facilities available are:

- Dermal fillers for under eye hollowing thin lips & volume loss
- Botulium Injections for fine lines, wrinkles, contouring & Hyperhidrosis.
- Thread Lift (Non Surgical Face Lift) - For Natural Tightening of face, neck & other body parts.
- Hair Loss Treatment
- Organic Peels for hyperpigmentation, pipples skin & for sun damaged skin
- Microdermabrasion- For Glow & Sun Tan Removal
- RF Cautery for Skigttag Removal, Mole Removal.
- Acne Scar Treatment
- Vitilligo Surgery
- Mole Surgery
- Laser - "Painfree Hairfree" only painless alma laser hair removal treatment in Central India
- Laser-Facial Rejuvenation (Photo Facial), Carbon peel, Melasma treatment.
- Laser-Tattoo, Mole, Freckles, Scar, Stretch Mark Removal
- Laser Bleach, Dark Spot Reduction by Laser With all the modern facilities, the

Dr. Anshul Jain

Pearl Skin & Laser Clinic also focuses on inculcating human values of trust, ethics and services and quality healthcare and come across as a respected healthcare organisation known for unmatched clinical excellence & quality patient care and thus, making individuals confident about their appearance and personality.

Dr. Hetal Parekh

Dr. Hetal Parekh has been working as Consultant Fertility Specialist at The Centre for Human Reproduction, Dr. L.H. Hiranandani

Hospital, Powai, Mumbai since 15 years. She has been providing dedicated services in the area of Women's health, her specialty being the management of infertility. Her approach towards infertile couples is a holistic approach with a personalized touch that involves in depth consultation, counseling and patient wellbeing. She is dedicated to go the root cause of the problem and treating it appropriately which is the scientific way to deal with infertility rather than having an IVF cycle based approach. Her aim is to make "HAPPY FAMILIES OUT OF COUPLES". She has worked with thousands of infertile couples not only in India but from all over the globe & managed them with IUI, IVF/ICSI cycles, Donor egg

Programs & surrogacy. She is committed to provide the couples with the most advanced medical treatment available, offered in an empathetic and caring environment. Thus at the Centre she assures best quality, individualized, compassionate fertility care.

She has also presented many papers on infertility in various conferences and has received many prizes for the same. A recent research paper on PCSI in male infertility has won many accolades. The Centre for Human Reproduction, Dr. L.H. Hiranandani Hospital, Powai, is one of the first infertility centers to adopt the latest innovations like PCSI, PRP of the ovary, PRP of the uterus with very good success rates.

Come the wait is over In the 21st century, the field of infertility management has undergone a sea change and we at Vamsam fertility strive to utilize this precious technology to wipe out the tears of these wannabe parents. Now couples have a hope to cling on. With enough knowledge about IVF, the acceptance of test-tube babies is increasing. Moving from rising in infertility in today's situation we see a lot of failed pregnancies despite doing these techniques.

Ultimately the patients go in for agony. With proper guidance we are able to give the ultimate bundle of joy to these patients says, our Infertility Expert, Dr. Aarthysumallda. Sometimes the real problem in infertility is scheduling an appropriate time period for sexual intercourse which might end up in non-consummation. Male infertility alone accounts to 30-40% of overall infertility incidence. Responsible healthy lifestyle changes including smoking

cessation, healthy diet, weight loss measures with ideal exercise will improve male fertility says, our Andrologist, Dr. S. Prasanna. We doctors have to be in the same mind set to really understand what they feel after all we are also women. Recent medical advances like surrogacy is also a good option for indicated patients.

We follow all legal criteria with transparent proceedings says, our Managing Director, Dr. Silambuchelvi.
